

LOW GHG RECOVERY TECHNOLOGY SCENARIOS FOR BITUMEN IN CARBONATE FORMATIONS IN ALBERTA WORKSHOP

February 15, 2007

Evaluation Summary - 6 Responses

1.

Please rate (✓) the following:	Very Poor	Poor	Satisfactory	Good	Very Good
Event Timing					
Presentation Content					
Presentation Topics					
Venue Location/ Accessibility					

2. Which aspects of this workshop did you find most valuable?

- Great general overview of the state of the carbonate development. I learned more about what we don't know than what we do but that is a good thing
- Rick's presentation
- Breakout session
- The breakout sessions were well done. The opportunity allowed for multiple opinions and facts to be presented
- Good discussion in brainstorm session
- Materials in some presentations are also useful
- Characterization of carbonate reservoirs
- New ideas open for development

3. Would you change anything about this event?

Yes

No

If yes, why:

4. What additional questions do you have on the information presented?

- How can PTAC contribute to the ARC/AERI/Industry carbonate initiatives

5. General Comments

- Great event
- Good informative event
- Great workshop
- It was good to have a 3-4 hrs meeting; short, concise and to the point
