

**Managing Microbes in Oil and Gas Fields to Reduce Souring and Corrosion and Enhance Recovery
Technology Information Session**

Thursday, June 8th, 2006

Evaluation and Feedback Summary

1. a) Did this session meet your expectations? 7 - Yes No
 b) If no, which expectations were not met?

2. a) Are you interested in obtaining additional information on this subject? 3 - Yes 4 - No
 b) If yes, what additional questions do you have?

- **Is more worked planned? Re: synergy of various types of biocides with nitrate/nitrate injection strategies?**

3. Is there another individual in your organization we should contact regarding this topic?

Name	Phone	Email
Joe Penkala	218-276-5674	Joseph.penkala@bakerpetrolite.com
Wayne Sudds	403-537-3850	Ewayne.sudds@bakerpetrolite.com
Dennis Combe	403-531-1330	Dennis.combe@cmgl.ca

4. How do you think this session could have been improved?

- **Perhaps more time spent on synergy of biocides with nitrates/nitrates**
- **Fine as it is**
- **Well done**

5. Please rate (√) the following:

	Very Poor	Poor	Satisfactory	Good	Very Good
Session Timing				4	3
Presentation Content				4	3
Presentation Topic				4	3

6. Are you interested in holding a PTAC technical information session? 0 - Yes 7 - No

7. General comments/suggestions:

- **Is analysis of different strains of SRB being done/considered to evaluate varying efforts / impacts of nitrate injection on these different strains?**
- **Suggest contacting Murray Edwards & his stable of companies – Penn West? Major operator in Pembina field – pouring problems. Also PenGrowth Trust**
- **Good job! Great topic!**
