Webinar on

'Methane Emissions Detection & Reduction Technologies'

Date: 15 June 2022 **Time:** 08:30 am (PST)

Hosted by Petroleum Institute of Pakistan (PIP), Global Affairs Canada – Trade Commissioner Service and Petroleum Technology Alliance Canada (PTAC), '**Methane emissions detection & reduction technologies**' is a multi-institution webinar focusing on sharing and discussing advances in the detection and mitigation of methane emissions from a variety of sources.

The participants will hear from leading experts who will share information on the latest developments and cutting-edge methods and novel technologies for leak detection, identification and quantification of methane emission and its reduction.

- 08:30 am **Welcome Speech by Ms. Nicole Harbauer - Trade Commissioner (Global Affairs Canada)**
- 08:35 am **Opening Speech by Mr. Michael Lazaruk - Counsellor (Commercial) & Senior Trade Commissioner - The Canadian High Commission, Islamabad, Pakistan**
- 08:40 am **Topic 01: Introduction to Methane Emissions Detection and Reduction Technologies**
Presenter: Dr. Soheil Asgarpour, PTAC
- 09:00 am **Topic 02: Detection of methane leaks and vented volumes**
Presenter: Mr. Josh Anhalt, GreenPath Energy
- 09:10 am **Topic 03: Clean combustion of methane and waste gases**
Presenter: Mr. Dallas Rosevear, Clear Rush Co.
- 09:20 am **Topic 04: Reduction of methane emissions with electric chemical pumps and instrument air systems**
Presenter: Mr. Steve Froehler, LCO Technologies
- 09:30 am **Topic 05: Reduction of methane emissions through site electrification**
Presenter: Mr. Henri Tessier, Calscan Solutions
- 09:40 am **Topic 06: Remote clean power systems**
Presenter: Mr. Connor O'Shea, Westgen Technologies
- 09:50 onwards **Question & Answer Session**
